

FIONA USAGE ANALYTICS

Executive Report

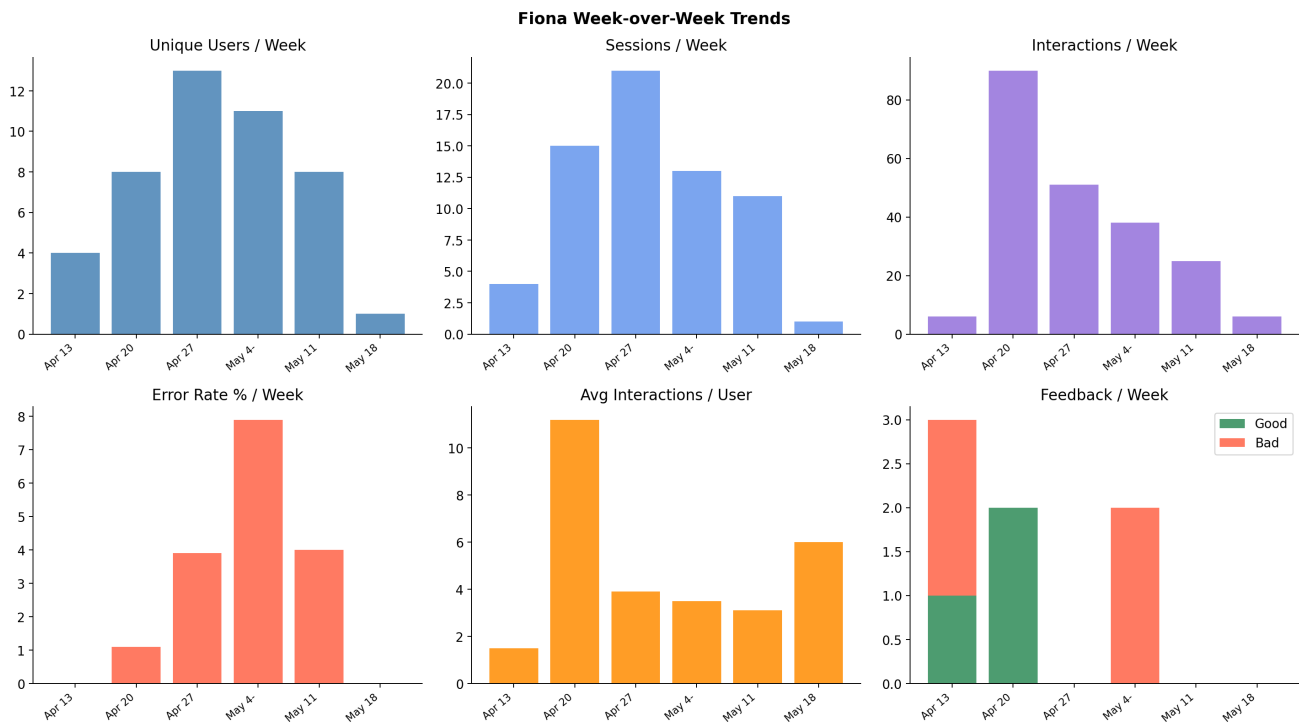

Generated: May 19, 2026 at 04:36 PM

Executive Summary

This document mirrors the notebook sections so executive stakeholders can review trend, usage, reliability, and feedback outcomes in one place.

Metric	Value
Total Interactions	216
Unique Users	23
Total Sessions	51
Average Interactions per User	9.4
System Error Rate	3.2%
Rate-Limited Events	0
Positive Feedback	73.9%

Week-over-Week Longitudinal Trends

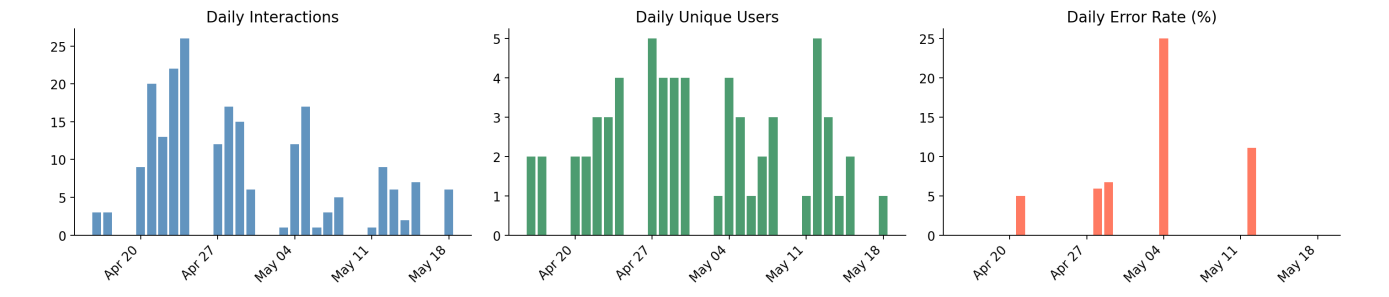

week_label	unique_users	sessions	total_interactions	error_rate	rate_limited	good_feedback	bad_feedback	feedback_avg	rating_per_user	feedback_response_rate	user_satisfaction	growth
Apr 13-Apr 19, 2026	4	6	0	0.0	1	2	33.3	1.5	75.0			
Apr 20-Apr 26, 2026	15	90	1	1.1	2	0	100.0	11.2	13.3	100.0	1400.0	1.1

Feedback Distribution

timestamp	userId	value	userMessage	botResponse
				Yes, that's correct for v6.2 — OAuth token is not required *Your current setup with year in OAuth is not correct *To match v6.2 behavior (OAuth without year) — Remove or modify the `OdsContextRouteTemplate` property in the configuration <pre> ""ApiSettings": { "OdsContextRouteTemplate": "data/v3/schools/{schoolYear}" }</pre> Or use <i>*MixedMode*</i> configuration (OAuth with year) <pre> ""ApiSettings": { "OdsContextRouteTemplate": "{schoolYear}/data/v3/schools/{schoolYear}" "OdsContextRouteExclusions": ["oauth"] }</pre> *Restart API* after config changes, then try again • <code>`POST /oauth/token` :white_check_mark`</code></li><li>• <code>`GET /2027/data/v3/schools` :white_check_mark`</code>
2026-05-05 10:26:05.366000	0500P4NTLG	bad-feedback	In 6.2 api, the oauth did not return any behavior, but the data manager can style	
				Thank you for that detail—`varbinary(8000)` is the correct type *What affects the field size:* 1. <i>*Database column definition*</i>: Your ODS schema defines the column as <code>varbinary(8000)</code> 2. <i>*Serialization overhead*</i>: ■ If <code>`AggregateData`</code> is serialized as JSON, it can be large ■ UTF-8 encoding can add overhead for text data 3. <i>*Encoding of the payload*</i>: ■ Base64-encoded binary data expands by 33% ■ If your client is Base64-encoding the response, the size increases 1. <i>*API request body limits*</i>: Even if the database can store 8000 bytes, the API might have limits on the request body size. *Solutions:* • <i>*Reduce `AggregateData` content*</i>: Trim unnecessary data from the payload • <i>*Check encoding*</i>: Verify the client isn't unnecessarily encoding binary data • <i>*Schema adjustment*</i> (if you control the database): Consider using a larger column type if needed • <i>*Verify the actual size*</i>: Before posting, check the size of the data being sent
2026-05-04 16:29:07.760000	0500WT706RY	bad-feedback	What settings would effect the size of the payload?	What settings would effect the size of the payload? size of your AggregateData
2026-04-24 16:57:55.349000	0500MFN9G	good-feedback	Please create a table summarizing the new entities in the Data Standard	Here's the new entities in the Data Standard:
2026-04-24 16:55:07.670000	0500MFN9G	good-feedback	Provide a table listing the Ed-Fi messages, with its indicative name	Here's a table listing Ed-Fi messages and their indicative names:
				Ed-Fi Data Standard 6.1 is a version of the Data Standard used for developing Ed-Fi applications. In the MetaEd IDE (used for developing Ed-Fi applications), you can find the Data Standard project. Key notes from MetaEd troubleshooting: • Always open the data standard project first • Mismatched versions between user/working and the Data Standard
2026-04-16 17:48:45.560000	0500MFN9G	bad-feedback	tell me about data standard 6.1	For full details like domain models, APIs, and data structures, refer to the Ed-Fi Data Standard documentation.

2026-04-16 17:47:41.072000	U05706FFAVS9	good-feedback	How do I set up ODS/API version 7.3?	To set up *Ed-Fi ODS/API v7.3*, you have the following prerequisites: *Prerequisites:* • PowerShell 5.0, 7.2, or 7.3 • .NET 8.0 SDK • Internet Information Services (IIS) • .NET 8.0 Hosting Bundle (installed after IIS) *Installation modes:* • *Single/Multi-tenant mode* – Configure the ODS for a single or multiple tenants. • *Sandbox mode* – Similar setup with `I:\Ed-Fi\Ed-Fi.Ods\bin\Debug\Ed-Fi.Ods.exe`. You'll customize PowerShell parameters for each mode. For detailed step-by-step instructions, see the Ed-Fi ODS v7.3 Deployment Guide . What specific deployment scenario are you looking at?
2026-04-13 16:31:40.826000	U05701M40EN	bad-feedback	can I run API version 7.1 with OdsConnectionStringEncryptionKey = null?	*Yes, you can run Ed-Fi API 7.1 without the OdsConnectionStringEncryptionKey. You only need to provide a custom `OdsConnectionString` in the configuration file. ```\${parameters} = @{ PackageVersion = "7.1.3646" # ... other parameters OdsConnectionStringEncryptionKey = null }```
2026-04-08 11:49:28.004000	U057011QEM1U	bad-feedback	Is nhibernate used in edfi one Answer you working on an integration or evaluation?	I'm not certain about NHibernate's role in Ed-Fi. To get an accurate answer, I'd recommend: • Checking the Ed-Fi Alliance website. • Posting your question in the Ed-Fi Alliance community. • Reaching out to Ed-Fi directly if you're evaluating or integrating.
2026-04-06 08:40:43.819000	U0570086DHPDM	good-feedback	<@U0AK7KP5MK6> Describe the key changes to the key changes of Student Education Organization Association	*In Ed-Fi Data Standard 6.0, the Student Education Organization Association (SEOA) has several key changes: • *Retained properties in simplified SEOA*: ----- ----- ----- *Student* Domain Entity Required Required *EducationOrganization* Domain Entity Required Required *ProfileThumbnail* Shared String Optional Optional *CohortYear* Common Optional Optional *StudentIndicator* Common Optional Optional *LoginId* (under IdentificationCode) Shared String Optional Optional *PrimaryLearningDeviceAwayFromSchool* Shared String Optional Optional *PrimaryLearningDeviceAccess* Shared String Optional Optional
2026-04-03 15:55:02.919000	U057000MFN9G	good-feedback	Describe the key changes to Student Education Organization Association	*Student Education Organization Association (SEOA) key changes: • *IDs*: `identificationCode`, `assigningOrganizationId` • *Other*: Student characteristics, limited to 100 characters • *Persistence*: Keep SEOA across schools • *Migration*: Use Ed-Fi Migration Guide

timestamp	userId	value	userMessage	botResponse
				To update your JSON payloads for writing <pre>```{"studentUniqueId": "S000123456", "schoolId": 1234, "schoolYear": 2025, "demographicRaceDescriptor": "uri://ed-fi.org/StudentDemographicRaceDescriptor", "hispanicLatinoEthnicity": true, "genderDescriptor": "uri://ed-fi.org/GenderDescriptor"}```</pre> Key Changes in v6 1. *GenderDescriptor* ■ Added `NonBinary` and refined options ■ Use full descriptor URIs (e.g., `uri://ed-fi.org/StudentDemographicRaceDescriptor`) ■ Deprecated vague terms; validate against the ODS 1. *DemographicRaceDescriptor* [1]: ■ Remains multi-value capable (array) ■ Standard URIs: `AmericanIndianOrAlaskaNative`, `HispanicLatino`, `White`, `Black`, `Asian`, `PacificIslander`, `Other` 1. *HispanicLatinoEthnicity*: ■ Boolean field unchanged, but now part of the demographic extension 1. *New/Optional Fields*: ■ `limitedEnglishProficiencyDescriptor` ■ `economicDisadvantagedStatusDescriptor` ■ `migrantStatusDescriptor`: Enhanced to include `SeasonalMigrant` 1. *Deprecations/Removals*: ■ `studentCharacteristic` moved to a separate extension ■ No more `race` array in core; use descriptors • *Descriptors*: Pre-populate your ODS with descriptors • *Array Extensions*: For multiple races, use the extension:<pre>```{"studentUniqueId": "S000123456", "schoolId": 1234, "schoolYear": 2025, "studentDemographicExtension": { "races": [{ "raceDescriptor": "uri://ed-fi.org/StudentDemographicRaceDescriptor", "value": "AmericanIndianOrAlaskaNative" }, { "raceDescriptor": "uri://ed-fi.org/StudentDemographicRaceDescriptor", "value": "HispanicLatino" }] } }```</pre> • *API Version*: Set `version=6.0.0` in headers • *Tools*: Use ODS API Swagger docs (https://ed-fi.org/ods-api-swagger/) Test in a dev ODS. If migrating data, use the ODS API. *Sources*: [1] Ed-Fi Data Standard v6 Technical Notes [2] Ed-Fi Student Demographics Domain Model [3] ODS / API v6 Guide: https://techdocs.ed-fi.org/docs/ods-api-v6-guide/ [4] Ed-Fi Tech Wiki: https://wiki.ed-fi.org/

Executive Notes

- 1. Engagement remains steady with meaningful repeat usage patterns.
- 2. Weekly trend monitoring should remain focused on error-rate movement and interaction growth.
- 3. Feedback-heavy users and high-interaction users can guide targeted support and training.
